

FLAX

WATERFREE URINAL
VITREOUS CHINA

Patented, sealed cartridge uses a biodegradable sealant liquid to control odors. 100% compatible with all Falcon Waterfree urinals, worldwide

WaterLess
Technologies

Falcon Waterfree urinals reduce water and sewer costs, maintenance and repair bills, and create more hygienic, odour-free restrooms. A patented, sealed cartridge eliminates the need for water, conserving an average of 150,000 litres per urinal each year.

With waterfree urinals, water does not have to be pumped to or from the urinal. This saves energy, which in turn reduces carbon dioxide emissions associated with energy production - emissions that would otherwise contribute to global warming.

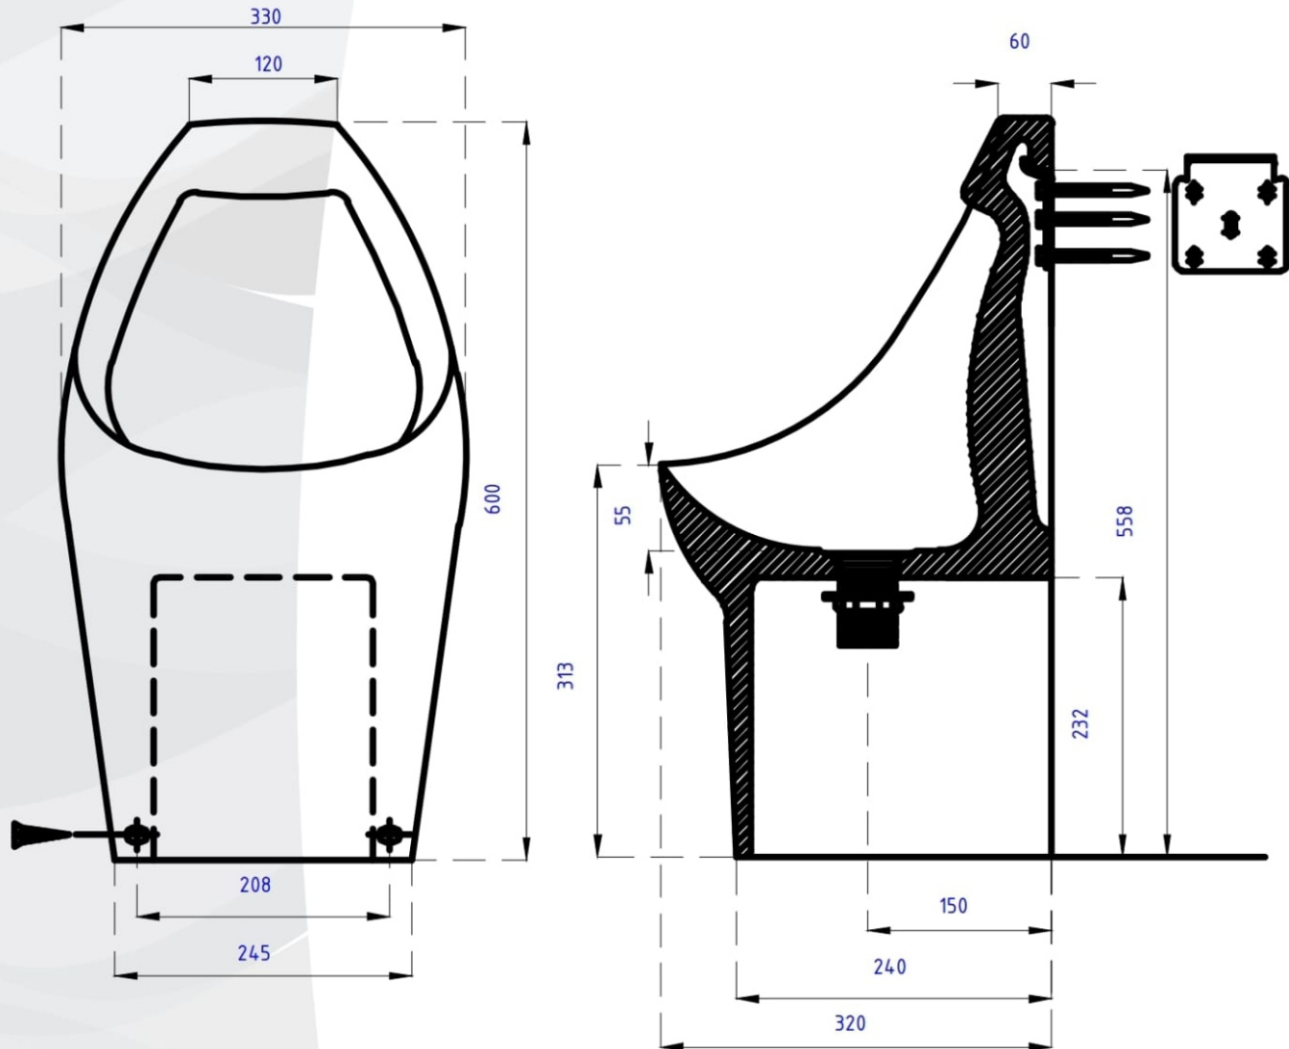

Purchasing and installing Falcon Waterfree urinals is less expensive than manual and automatic flush units because flush valves and associated piping are not required. Maintenance costs and vandalism problems associated with flush valves are also eliminated.

FEATURES

- Touch-free operation
- Uses no water
- Mechanical-free design
- Patented, sealed locking cartridge
- Maintenance-free cartridge
- Smooth, non-porous surfaces
- Vitreous china bowl

BENEFITS

- Improved hygiene and safety
- Reduced water and sewer costs
- No costly flush valve or sensor repairs
- Odour-free and vandal proof
- No need to replenish sealant between changes
- Minimal care and easy cleaning
- Unsurpassed durability
